

Preparing For Your New Roof

First Response Roofing wants to help you prepare for your new roof or repair! We want to ensure that you are as happy with the process as you are with the finished project on your home.

While projects may vary, this is based on the average home. Your Estimating Specialist will help manage your expectations by letting you know why your project may need less or additional time based on the details and layout of your roof.

What to Expect:

- On the morning your roof replacement is ready to begin, the dumpster will arrive approximately between the time of 7-7:30am.
- In order to prevent your vehicles from being stuck in the garage or delaying the trailer delivery, be sure to move your vehicles the night before.
- Shortly after, typically around 7:30-8am, your crew will arrive and will begin to work immediately to perform your tear off off your existing roof.
- The shingles will be delivered by a conveyor belt typically in the afternoon.
- Depending on the size of your roof, the tear off and dry in is completed by the end of the day. Your crew will do the tear off and dry in starting from the farthest position from the trailer and move towards the trailer. This prevents your crew from stepping on or damaging any new material installed in this process.
- The dry in will protect your home and the wood underneath it from any weather that may occur during your installation.
- On the following day, your crew will arrive approximately the same time as before to begin installing the new roof.
- Depending on your local municipality, once the roof installation is about at 25% complete, an in-progress inspection is typically done.
- After the inspection has been completed, your crew will continue the installation until the roof is complete.
- Upon completion, a final inspection will be done as well as an inspection with you and your estimator to ensure your satisfaction.

If you have any questions and/or concerns during your project please reach out to us at (239) 963-9657
